Declaration

Date: December 22, 2025

To Whom It May Concern,

This letter serves to formally confirm that the RealScan SG10 Series (including RealScan SG10 and RealScan SG10i) utilizes the Microsoft WinUSB (WinUSB.sys) native driver for communication with Windows operating systems.

With regard to the request for a WHQL (Windows Hardware Quality Labs) certificate, please note the following:

1. Native Driver Usage
   The RealScan SG10 Series (including RealScan SG10 and RealScan SG10i) is designed to interface with the Windows-provided Microsoft WinUSB (WinUSB.sys) driver. WinUSB.sys is a native, in-box component of the Windows operating system and is provided as part of the standard Windows environment.

2. Pre-Existing Certification
   As a Microsoft-authored driver, WinUSB.sys is digitally signed and maintained by Microsoft Corporation. Accordingly, it does not require additional certification or a separate WHQL submission by the device manufacturer.

3. Driver Integrity
   The RealScan SG10 Series (including RealScan SG10 and RealScan SG10i) does not use or provide any custom kernel-mode or third-party drivers. Therefore, no third-party code is loaded into the Windows kernel, and driver reliability and compatibility are ensured by Microsoft as part of the operating system.

Authorized Signatory

Minjin Kim
