Precautions

✓ Warnings and Considerations

- If cleaning solution remains on the fingerprint capture area, it may cause stains or degrade the quality of the product.
- If any chemicals come into contact with the surface, wipe them off immediately and clean with a water-based solution.
- Common chemicals that require immediate attention include the following:
  - Acetone and polish
  - Paint & Stain removers
  - Gasoline and petroleum
  - Pesticides and herbicides
  - Cleaning cloths or wipes that contain any of the above chemicals
